PROJECTS

Premium Brands Services LLC (Oct 2023 – Mar 2024)

Role: Front end Developer

- Led the design and implementation efforts for a Salesforce Commerce Cloud (SFCC) based website, contributing to enhanced user experiences through the incorporation of JavaScript functionalities aligned with Figma designs.
- Diligently crafted SEO-friendly designs adhering to W3C standards and wrote **Unit test cases** to manage the quality of deliverables.
- Successfully tackled the optimization challenge posed by a large-scale ecommerce platform by implementing code factoring techniques, resulting in improved performance metrics highlighted in the LightHouse SEO report.

Adidas, Kingdom of Saudi Arabia (Sept 2023 – Oct 2023)

Role: Jr. Front end Developer

- Within the SFCC project, I played a pivotal role in configuring and developing the Business Manager, strategically updating and maintaining page content to meet evolving business needs.
- Responsible for seamless deployment of changes across multiple environments, encompassing both staging and production. Also integrated Currency Pricebook and navigation as per business requirements.
- successfully integrated Currency Pricebook and executed navigation enhancements in alignment with precise business requirements.

React UI Component Library POC (July 2023 – Sept 2023)

Role: Team Lead

- Led the team of 7 folks to help them creating React components using **Material UI** and **debugging code errors**.
- Collaborated with team leads to design a web application using React
- Implemented **Storybook JS**, a frontend workshop for UI development and presented to Pune and Nagpur DC team.
- Submitted Infosys Cobalt Asset for one of the react component.
